PRODUCT DESCRIPTION

Is your idea for a new product or an improvement to an existing product?

Is there a patent or pending patent on this product idea?

Are you in conversation regarding this product idea with another manufacturer?

Are you currently using this product on your jobsite?

What other similar products exist and how does your idea differ? Also, please provide the URLs / links to any applicable websites.

Describe your product idea in detail. Be sure to explain how the product works and identify the problem(s) that the product solves.

SUBMISSION INSTRUCTIONS

This form may be mailed or faxed to Garvin Industries. Please be sure to include any applicable diagrams, blue prints, and / or prototype(s).

Mail to:

Garvin Industries, Inc.
Attn: Barton L. Garvin, President
3700 Sandra Street
Franklin Park, IL 60131

Fax to:

Garvin Industries, Inc.
Attn: Barton L. Garvin, President
Fax: 847-455-0334

PROCESS

Acknowledgement

When Garvin Industries receives your submission, we will contact you to confirm receipt.

Evaluation

Garvin Industries will review your submission and examine important success criteria of your idea including market demand, consumer appeal, profitability, and competitive analysis. This process will typically take 20 – 30 days from the time we receive your submission. We will contact you via mail or email to let you know the outcome of our evaluation.

Post-Evaluation Meeting

If Garvin Industries determines your idea would result in a marketable and profitable product, we will contact you to schedule a time for an in-depth discussion. During this meeting, we will discuss product application and use; competitive advantages and benefits; design; functionality; manufacturing requirements; business terms; and many other aspects of the product development and marketability.

Engineering and Design

If the outcome of our discussion is to proceed, we will work with you to design, develop, and manufacturer a prototype (if one does not already exist). After the prototype has been tested, refined, and meets specifications, we will obtain your written approval of the design and terms of our business relationship before mass manufacturing the new product.

Promotion and Compensation

Garvin Industries will then promote, market, sell, and distribute the new product. You will receive compensation per our business agreement.
