**Warning:**
Garvin products shall be installed and used only as indicated in Garvin product instruction sheets, training materials and from your Garvin customer service representative. Garvin products must never be used for a purpose other than the purpose for which they were designed or in a manner that exceeds specific load ratings. All instructions must be completely followed to ensure proper and safe installation and performance. Improper installation, misuse, misapplication or other failure to completely follow Garvin’s instructions and warnings may cause product malfunction, property damage, serious bodily injury and death.

**Note:** All load ratings are for static conditions and do not account for dynamic loading such as wind, water or seismic loads, unless otherwise noted.

**For Low Voltage Class 2 Use Only.**

**Screw mount low voltage bracket**
For drywall up to 1-1/4” (double 5/8”)
Screws included

1. Using the interior cut out opening on the WBF as a guide, trace and cut an opening in the drywall.
2. Hold and bend inner tabs 90° inside wall cavity.
3. Insert bracket through wall opening.
4. Bend inner tabs on bracket behind wall surface.
5. To pull the bracket tight against the wall, use standard drywall screws provided.
6. Mount a standard wall plate for low voltage class 2 systems.

---

**The customer is responsible for:**

a. Conformance to all governing codes.

b. The integrity of structures to which the products are attached, including their capacity of safely accepting the loads imposed, as evaluated by a qualified engineer.

c. Using appropriate industry standard hardware as noted above.

**SAFETY INSTRUCTIONS:**
All governing codes and regulations and those required by the job site must be observed. Always use appropriate safety equipment such as eye protection, hard hat, and gloves as appropriate to the application.
